

ABDULSALAM ISSA

Software Developer

EXPERIENCE

Software Engineer — Self-Directed Projects

Remote, Nigeria | January 2024 – Present

- Discipline & Streak:** A fullstack web application with authentication, role-based permissions, caching, and rate limiting on critical endpoints. Built with Django for its strength in heavily data-driven systems. discipline-hu97.onrender.com/v1
- HttpChat:** A Django-based chat application built entirely over HTTP instead of WebSockets, designed to push HTTP beyond its typical limits and explore where it breaks. httpchat.onrender.com
- Photo Compressor:** A terminal-based Python tool for compressing images to a custom quality level, with fully documented usage instructions. github.com/Lastissa/photo-compressor
- School Management System:** A REST API for school management built with Django REST Framework and Django, implementing authorization, authentication, CSRF protection, and SQL-injection protection.
- Lecture Tracker:** A mobile application built with Flutter and Django that keeps students accountable by surfacing lecture analytics and highlighting areas for improvement.

EDUCATION

B.Sc. Computer Science

Federal University of Ilorin | October 2025 – June 2029 (Expected)

Current CGPA: 4.44

ACCOMPLISHMENTS

- Maintaining a 4.44 CGPA
- Led a team of 10 in a school project

PROFILE

Driven backend developer focused on solving invisible problems using the right tool for the right job — Django for AI-driven systems and data-heavy applications, Go for concurrency and speed-critical projects, and FastAPI for microservices and MVPs.
